

AUTO-Fiche™ Carrier

Making Your Microfiche Research “Hands-Free” and Hassle-Free

e-ImageData continues to be on the cutting edge of digital technologies in the microfilm industry, and is proud to introduce the **AUTO-Fiche™ Carrier**. The AUTO-Fiche Carrier (AFC) simplifies everything in the process of using and scanning microfiche. Just as roll film users can automatically scan a roll of microfilm, now microfiche users can enjoy the same automatic features and ease-of-use that they've come to expect from e-ImageData and the ScanPro line of products.

Prior to the AFC, users manually moved the fiche carrier to find their desired image. This process can be lengthy and frustrating. The AFC eliminates all of this manual work! The motorized carrier is operated entirely by on-screen controls, allowing users to move directly to the desired image anywhere on the fiche with a single click! In addition, it can automatically scan a range of images or the entire fiche.

- Automatically scan a range of images or the entire fiche
- Scanning speeds up to 60 images per minute
- Use on-screen controls to perform all operations
- Move through your fiche image-by-image with just a click
- With exception of the ScanPro 1000, retrofittable to every ScanPro model
- Backed by our three-year factory warranty
- Enjoy free software updates and upgrades for the life of AFC with an annual subscription fee of just \$249/yr

*“We have to have the
AUTO-Fiche Carrier!”*

— The LDS Church History Library

*“Maybe our users will stop cringing
when they use fiche with the new
AUTO-Fiche Carrier features!”*

— University of Northern
Colorado Library

*“We couldn't live without our ScanPros!
Can't wait to add the AUTO-Fiche Carriers!”*

— Sabrina, Columbia Law Library

AUTO-Fiche Carrier (AFC) Features and Specifications

With the exception of the ScanPro 1000, the AUTO-Fiche Carrier is retrofittable to any ScanPro model and integrates with all of that models features and capabilities

A current ScanPro model ordered from the factory with an AFC is shipped ready for on-site installation

An on-site ScanPro model upgraded with an AFC requires a field upgrade kit

Film selection Wizard to recall job presets for quick and easy setup for Fiche and Roll File

User Interface: Intuitive Windows computer interface; simple and easy-to-use

Step-by-step graphic animations for easy startup for Fiche and for Roll Film applications

Carriers (optional): 16/35 roll film, 16/35/M roll film & cartridge

NOTE: AUTO scanning on a ScanPro 2200 requires an installed AFC

AUTO-Scan (Included)

Auto Crop, and Straighten

Unlimited Roll Film scans*, up to 10 pages/minute (forward or reverse)

Unlimited Fiche scans, up to 20 pages/minute

AUTO-Scan® Pro (optional)

Auto Brightness, Contrast, Straighten, Crop

OCR while scanning and save as multipage PDF

Unlimited Roll Film scans², up to 55 pages per minute (forward or reverse)

Unlimited Fiche scans, up to 60 pages per minute

* Requires Roll Film carrier

AUTO-Fiche Carrier Product Information

Fits almost anywhere	Smallest operating footprint
Operating Systems	Win 7 to Win 10 (32 and 64 bit)
Interface	USB 3.1 Gen 1 (also called USB 3.0)
Weight	9.6kg (21.5lbs)
Dimensions (H x W x L)	18cm x 39cm x 41cm (7in x 16in x 16in)
Power	24VDC 2.5A
Product Safety	OSHA workplace safety certified to US/CA standards

Patents 8,269,890; 8,537,279; 9,179,019; 9,197,766; 9,158,983 © 01/2018 e-ImageData Corp.

WHAT'S MOVING Your Microfiche?

The AUTO-Fiche Carrier allows you to find your microfiche images easily and efficiently. It is controlled by using the familiar and easy-to-use, Powerscan software and all controls are done on-screen.

With the AFC, you can click on a single image, a range of images, or the entire fiche to scan and save.

The AUTO-Fiche Carrier is the newest revolution in microfiche research and **the best part is that it can be added to every ScanPro unit**, with the exception of the ScanPro 1000.

Using the AUTO-Fiche Carrier
is as easy as **1...2...3!**

- 1** Load your microfiche into the carrier glass.
- 2** "Select the grid."
- 3** Click the appropriate grid location to move directly to your desired image.
